CATEGORY:

Body Therapy | Detox & Target Solutions

SUITABLE FOR:

Unisex | All skin types

USES:

- Detoxifying spa at home treat

HOW TO APPLY/USE:

Step 1: Preparation

Lay out the suit in the bathroom so you can easily step into it after applying mud. Put a spare towel by the side of the suit. If you have long hair, put it up, out of the way.

Step 2: Apply GLORIOUS MUD.

Gently warm GLORIOUS MUD between the palms of your hands and slather on the body.

Step 3: Suit up

Step into the suit, feet first (your feet are covered and sealed in), with the opening section towards the front.

Pull the suit up to the waist. Slip arms into arm sections (hands will be fully covered). Pull up over the shoulders. Take the two sections at the front (with split down the middle) and tie them up near your neck. See illustration.

Step 4: Seal the suit

Using your hands, press the suit down onto the mud so it sticks. This will 'seal' the suit, enabling the heat and moisture to generate at its most effective level.

Step 5: Relax

Wrap a towel or robe around you so you can sit or lie down and relax for 20 minutes. You'll feel the suit get really steamy. You can have a drink of water nearby to keep hydrated as you 'sweat'. Take care when walking around, to avoid slipping.

Step 6: Remove the suit and step into a warm bath or shower to wash off.

Glorious!

- ✓ Natural bristles won't irritate the skin

CATEGORY:

Body Therapy

SUITABLE FOR:

All skin types

USES:

- Dry skin brushing for a home detox.
- To prepare the skin for a faux tan and before applying body moisturiser.

HOW TO USE:

On dry skin, before you shower or bathe, take the brush in the palm of your hand. Get a firm grip and use the strap to support the hand. Start brushing at the feet and work up the legs, using gentle, sweeping movements towards the heart. Then, work on your hands and move up the arms the over shoulders, back and body. Avoid the very sensitive areas of the chest and do not use on the face. You can follow this routine daily or every 3-5 days for 5 minutes a day.

HOW TO LOOK AFTER YOUR BRUSH

The bristles on your brush need to be cleaned regularly to avoid bacteria growth.

The easiest way to do this is by filling a bowl with soapy water.

Place the brush in the water, bristles facing down and move around for a minute or so.

Then make sure the bristles dry completely; using a towel or letting it air dry on a warm day.

Try not to get the wood too wet as it can get damaged.

How often you clean your brush depends on how often you use it. If you use it daily, we recommend that you clean it once a week. Once a month should be enough if you use your brush once a week.

LIFE DEFENCE

SPF 30 MOISTURISER
protects & hydrates
rocket | ginseng | vitamin e

Your front line skin defender!

This feather-light moisturiser provides an environmental skin filter for your face. With UVA/UVB broad-spectrum protection SPF 30, plus a potent antioxidant complex of rocket, ginseng root, vitamin E and hyaluronic acid. These clever ingredients create a barrier against the sun and skin-damaging free radicals, city pollution, air con, high energy visible blue light from digital devices and daily skin stress. LIFE DEFENCE safeguards your skin leaving it comfortable, radiant and healthy, 7 days a week, 365 days a year.

BENEFITS:

- ✓ Protects against pollution & the harmful effects of high energy visible light
- ✓ Helps to prevent the appearance of sun-induced age spots and damage
- ✓ Broad-spectrum UVA/UVB protection
- ✓ Suitable for all skin types including sensitive skin

CATEGORY: Skin Therapy | All Skin Types | Norm-all Skin

SUITABLE FOR: Everyone, even sensitive skin

USES:

- Use as a daily moisturiser alone or over the top of your usual moisturiser
- Apply generously to ensure protection from exposure to the elements. Repeat application when out and about for long periods of exposure to the elements.
- Daily facial sun protection all year round

KEY INGREDIENT CLAIMS:

- **Rocket extract** – is rich in isothiocyanates which help to counter the effects of free radicals. It also has powerful soothing, anti-redness and antioxidant properties.
- **Hyaluronic acid** – known for its anti-ageing, hydrating and moisture restoring properties, resulting in skin looking and feeling softer, smoother, plumper and radiantly hydrated.
- **Vitamin E** – an antioxidant ingredient which helps protect cells from damage and environmental pollutants. Antioxidants fight against the oxidant effect of free radicals (molecules that damage collagen and accelerate the ageing process).
- **Glycerol stearate** – derived from palm kernel, vegetable, & soy oil it's also found naturally in the human body. It acts as a lubricant on the skin's surface, which gives the skin a soft and smooth appearance. It easily penetrates the skin and slows the loss of water from the skin by forming a barrier on the skin's surface. It has been shown to protect skin from free-radical damage as well.
- **Ginseng root extract** – derived from the roots of the Withania Somnifera plant this organic extract has been used in traditional medicine for millennia. It's proven to protect against blue light exposure & digital pollution which is known to cause additional environmental stress to the mitochondria on our skin which play a key role in maintaining healthy skin cells.

As a moisturiser LIFE DEFENCE provides broad Spectrum UVA/UVB protection. That means it helps to protect against UVA and UVB rays.

- **UVA rays are 30 to 50 times stronger than UVB rays. They are known to cause damage at all levels of the epidermis resulting in premature skin ageing, and are a cause of deep lines and wrinkles.**
 - The UVA filter in LIFE DEFENCE is Butyl Methoxydibenzoylmethane.
- **UVB rays do not penetrate the skin as deeply as UVA rays. The intense energy from UVB rays is spread over the upper layers of the skin and can cause more damage. UVB rays are the primary cause of skin reddening, sunburn and photoaging.**
 - The UVB filters in LIFE DEFENCE are Octyocrylene, Ethylhexyl Methoxycinnamate & Ethylhexyl Salicylate.

WHAT IS SPF AND HOW DOES SPF RATING WORK?

SPF — or Sun Protection Factor — is a measure of a sunscreen's ability to prevent UVB from damaging the skin. Here's how it works: If it takes 20 minutes for your unprotected skin to start turning red, using an SPF 30 sunscreen theoretically prevents reddening 30 times longer. LIFE DEFENCE has an SPF rating of 30.

It is always important to protect yourself from the harmful effects of the sun. The sun is strongest between 11am - 3pm. Have a lazy lunch or bag an umbrella and stay in the shade during these hours when possible. Sunrays are actually harmful all year round not just in the summer months. Stay protected to avoid premature ageing.

HOW TO APPLY/USE: Apply generously over clean skin or over your daily moisturiser. Repeat the application when out and about for long periods of exposure to the elements. Your SPF products should be reapplied as a minimum every 2-hours if you're exposed to the sun.

Leave on for 20 minutes. Relax and let the serum-like formula go to work. Whilst the mask is on you can also use THE ELEVATOR for the first and last 2 minutes.
