TEMPLESPA

WHAT WILL IT REVEAL?

IMMEDIATE VISIBLE RESULTS ON SKIN THAT'S...

- RADIANT
- GLOWING
- BRIGHTER
- RE-ENERGISED
- SMOOTHER
- FRESHER
- HEALTHIER
- YOUNGER
- SOFTER
- MORE EVEN IN TONE
- LESS VISIBLE PORES
- UNCLOGGED SQUEAKY-CLEAN PORES
- FADED AGE SPOTS
- DECONGESTED CLEAR COMPLEXION
- LESS BLEMISHES & SPOTS

NO MATTER WHAT SKIN TYPE YOU HAVE
CLINICALLY TESTED FOR ALL SKIN TYPES

TEMPLESPA

MOST REVEALING GLOWING SKIN OXYGEN PEEL

Bubbles Darling!

Looking for instant, yet serious results you can see in the mirror? This state-of-the-art oxygenating bubble peel powerfully transforms your complexion from lacklustre to positively glowing. The highly effective formula is powered by vitamin C and a cocktail of glycolic, malic, lactic, citric and hydroxy acids that are all good for your skin! Sodium hyaluronate hydrates and cushions the skin while it foams and fizzes, lifting away dead skin cells and decongesting debris from the pores.

Botanical extracts of apple, kiwi and chamomile soothe, vitamins A & E nourish and Mediterranean oils of sweet orange & bergamot work together to reveal unbelievably smooth, bright and radiant skin.

Your skin will be resurfaced, re-energised and refreshed. So, bubble up and let the glow begin!

- Deeply purifies to reveal healthier looking skin
- Helps to re-texturise and correct uneven skin tone
- Instant facial for radiant skin
- Smooths & refines the appearance of fine lines & wrinkles

TEMPLES SPA

HOW & WHEN TO USE MOST REVEALING?

After cleansing, and before applying your toner.

Pump twice into the hand and apply to clean damp skin, avoiding the eye area.

Smooth on, give it a good massage and leave to fizz and bubble. Once bubbles subside remove thoroughly with a warm damp cloth and then splash your face with warm water. Pat skin dry and follow with a toner, serum and ideally an SPF moisturiser.

Use once or twice a week to look simply fabulous.

Sunburn Alert: This product contains an alpha hydroxy acid (AHA) that may increase your skin's sensitivity to the sun and particularly the possibility of sunburn. Use a sunscreen, wear protective clothing, and limit sun exposure while using this product and for a week afterwards.

TEMPLESPA

A close-up photograph of a person's hands. The person is wearing an orange top. They are holding a clear plastic bottle with a black cap, tilted to pour a thick, yellow, gel-like substance into their left hand. The bottle has a black logo and the word 'PLESPA' visible. The background is a soft-focus orange.

IS IT FOR EVERYONE?

We've clinically tested the formula to ensure it is suitable for all skin types.

But for those with very sensitive skin, it would be best to do a patch test first. We suggest doing this on your jaw line out of sight - give it a minute on the skin and remove if uncomfortable.

AHA's and glycolic acids shake up your skin and can make skin feel a little uneasy and sensitised with first use.

It is quite normal to experience a tingling sensation with this type of formula and this shouldn't necessarily be seen as an allergic reaction. As with any product, if skin feels very uncomfortable then stop use.

TEMPLESPA

WHY USE A MASK ?

At TEMPLESPA, we pride ourselves on our range of facial masks and their performance in the treatment world. Their talents range from deep cleaning, smoothing and hydrating the skin and unclogging pores to being a relaxing, pampering treat for the 'me-time' we all crave for time to time. It's not a case of justifying their use, it's a question of identifying which ones are right for you!

We hope this guide helps you on your journey of discovery.

THE USER TRIAL

Don't just take our word for it...
here's what our independent user trials said.

"Love the feeling of this mask it feels like a mini spa treatment at home!"

"Amazing product, while highly recommend this to all my friends"

"I love the concept of the mask and how it feels on the skin. The results are impressive too."

"Love this product, it has such a lovely effect, makes my skin feel great!"

"Absolutely fantastic, it's magic in a bottle."

"Love the fizzing feeling. It's like you can feel it working."

"It's a very nice product my skin feels great and smoother than before."

"Love the bubbling effect."

"I love this product made my skin so clear and soft."

"This product has made me feel more confident, it's improved my skin and how I felt about the appearance of my facial skin."

"One of the best that I've used, skin felt deeply cleansed and it removed all impurities. I did feel a lot more radiant and glowing"

"Really has made a difference, my skin looks brighter and it feels amazing on the skin. I love quick spa masks and this is ideal for anyone who is short on time or doesn't have patience to wait. Nice wee treat. After applying the bubble mask, I added a hydration mask and this made the perfect duo! Would definitely purchase this product and would appreciate it if you could let me know what it is. Thank you"

"Absolutely loved this product. Left my skin feeling like new. Was soft to touch and my skin looked radiant. My skin was glowing. Would definitely like to continue to use this product."

"Beautiful smell, skin feels so refreshed after use would highly recommend to everyone."

TEMPLESPA

THE KEY INGREDIENTS

GLYCOLIC ACID 0.74% -

is an alpha-hydroxy acid (AHA), it exfoliates built-up dead skin cells and resurfaces dull, uneven skin for a smoother, brighter, more even-looking complexion.

MALIC ACID 0.205% -

is derived from apples. It also occurs naturally in all fruits, many vegetables and in the human body. It's cross between a BHA and AHA and is a mild exfoliant which helps to promote a smoother, more even skin complexion.

MANDELIC ACID 0.07% -

is an alpha-hydroxy acid (AHA), a go-to anti-ageing ingredient in the world of skincare. It works to accelerate cell turnover by dissolving the tiny bonds that hold skin cells together, helping to remove dead skin on the surface that can lead to dull complexions, as well as fine lines.

LACTIC ACID 0.04% -

is an alpha-hydroxy acid (AHA). It boosts the exfoliation process and stimulates superficial cells growth. It also has moisturising and water-holding properties.

RETINYL PALMITATE 0.05% -

also known as vitamin A its an antioxidant, also helps even out skin tone, smooth this skin leaving it feeling softer and more radiant.

MEDITERRANEAN OILS -

sweet orange oil and bergamot

BOTANICAL EXTRACTS -

apple, kiwi and chamomile

HOW CAN ACID BE **GOOD FOR THE SKIN?**

The very word “acid” makes you think of a bubbling test tube of smoking chemicals that surely would burn the skin on contact. This is **NOT** the case – dermatologists say that, for most, this new generation of face acids are the miracle key ingredients for happy, healthy skin.

The concentration levels of face acids are regulated for general use in cosmetics to ensure they are safe to use. MOST REVEALING, as all our formulas, has been approved by independent toxicologists and safety assessors and so we are confident with its beneficial effects and behaviour on skin.

MOST REVEALING has also passed an all skin types patch test. In fact, a sensitive skin may find physical scrubs too abrasive and a gentle chemical peel more suitable.

Our independent user trial also confirmed how beneficial acids can be in your daily skin care routine.

TEMPLESPA

GLYCOLIC ACID

A LITTLE MORE DETAIL

The most powerful of the alpha hydroxy acids (AHA's) it's the 'holy grail' ingredient for exfoliation and is derived from sugar cane.

It effectively removes the layer of dead skin cells from the top of the skin, revealing brighter, fresher skin. It's used to treat scarring, skin discolouration and minimises the appearance of fine lines and wrinkles.

Its power ironically lies in its molecule size which is smaller than other AHA ingredients. This allows it to rapidly penetrate to the lower layers of the skin, cleaning out dirt and grime from our pores and loosening any built up sebum and proteins around hair follicles.

TEMPLESPA

MALIC ACID

A LITTLE MORE DETAIL

Malic acid is an AHA (alpha-hydroxy-acid) that is derived from apples and is considered to be gentle, but with highly effective results. It is praised for its incredible brightening effects as it removes the dead skin cells from the top layer of your skin that can cause your complexion to be dull when they build up over time. It also helps to remove bacteria and excess sebum to keep pores clear and unclogged, making it a great addition for those who are acne-prone.

Malic acid is a larger molecule than other AHAs, which makes it perfect for more sensitive skin types as it doesn't penetrate as deeply into the skin. Those that suffer from eczema may find it helps to calm and reduce irritation.

What's more, it has the added benefit of acting as a hydrating ingredient that helps to attract moisture and trap it, for plump, smooth skin.

MANDELIC ACID

A LITTLE MORE DETAIL

The mandelic acid we have used comes from a unique source, curated in the laboratory. It is produced by chemical synthesis to make it completely nut-free. It's used for its skin smoothing and glow-inducing prowess.

If you're wary of using mandelic acid you needn't be. It's softer and slower to react on the skin than other AHA's and as a result of its mildness, it's been used for the treatment of acne.

It gently buffs away the top layer of dead skin cells to reveal smoother, more radiant skin.

TEMPLESPA

LACTIC ACID

A LITTLE MORE DETAIL

Lactic acid is an alpha hydroxy acid (AHA) derived from milk (or it can be created synthetically, which ours is). It can also be found in the body and builds up after intense exercise.

Used in skincare for its ability to treat hyperpigmentation and age spots, it's a key ingredient in improving skin tone. It can also reduce the appearance of pores.

All AHA's exfoliate the skin but lactic acid also helps to keep the skin moisturised and feeling less dry.

TEMPLESPA

HYALURONIC ACID

A LITTLE MORE DETAIL

Also sometimes referred to as Sodium Hyaluronate, which is the salt from Hyaluronic Acid.

It is naturally found in the dermis of the skin but as we get older its levels decrease, which causes skin to age.

It has a smaller molecular size meaning that it can easily penetrate the skin to be effective.

This fabulous ingredient has very strong moisturising properties to help preserve suppleness in the skin.

By locking in moisture, the effects are a plumper, smoother, more lifted look and skin regains a youthful, healthier bounce.

TEMPLESPA

RETINOL

A LITTLE MORE DETAIL

Retinol, (retinyl palmitate), is a form of Vitamin A and is a powerful multi-tasking ingredient.

It helps to improve the condition of rough and dry skin, improving the look and feel of the skin.

It lessens the appearance of fine lines and wrinkles and aids skin elasticity for plump, youthful skin.

It can even help to reverse side effects of sun damage; it treats uneven skin tone, pigmentation and shrink enlarged pores.

It can also help acne sufferers as it helps promote cell turnover and prevent the clogging of pores to defend against blemishes.

TEMPLESPA

The background of the entire page is a dense, overlapping pattern of fresh orange slices. The slices are cut into thin, circular rounds, showing the vibrant orange pulp and the white pith. The lighting is bright, highlighting the texture of the fruit segments.

SWEET ORANGE OIL A LITTLE MORE DETAIL

One of the most popular fruits in the world, oranges are rich in vitamin c which as part of a healthy diet is great for the immune system, lowering cholesterol and keeping blood pressure in check.

As well as vitamin c, oranges are full of antioxidants which help fight free radical damage, a known cause of premature skin ageing.

They also have a high content of citric acid which aids the exfoliation of dead skin cells, helping to purify the skin by clearing away blemish-causing dirt and grime resulting in smoother, lighter and brighter skin tone.

TEMPLESPA

BERGAMOT OIL

A LITTLE MORE DETAIL

Bergamot is a natural antiseptic and bacterial growth inhibitor, making it great for oily and acne-prone skin. It helps kill blackhead and spot-creating bacteria and also helps control excess oil production.

As an antiseptic, it helps the skin regenerate and can help with scars and stretch marks by evening out skin tone.

It possesses purifying, cooling and energising properties. It creates the feeling of freshness, joy and energy by improving the circulation of your blood. It also works as a sedative to ease anxiety by stimulating hormones such as dopamine and serotonin which help you to relax.

TEMPLESPA

APPLE

A LITTLE MORE DETAIL

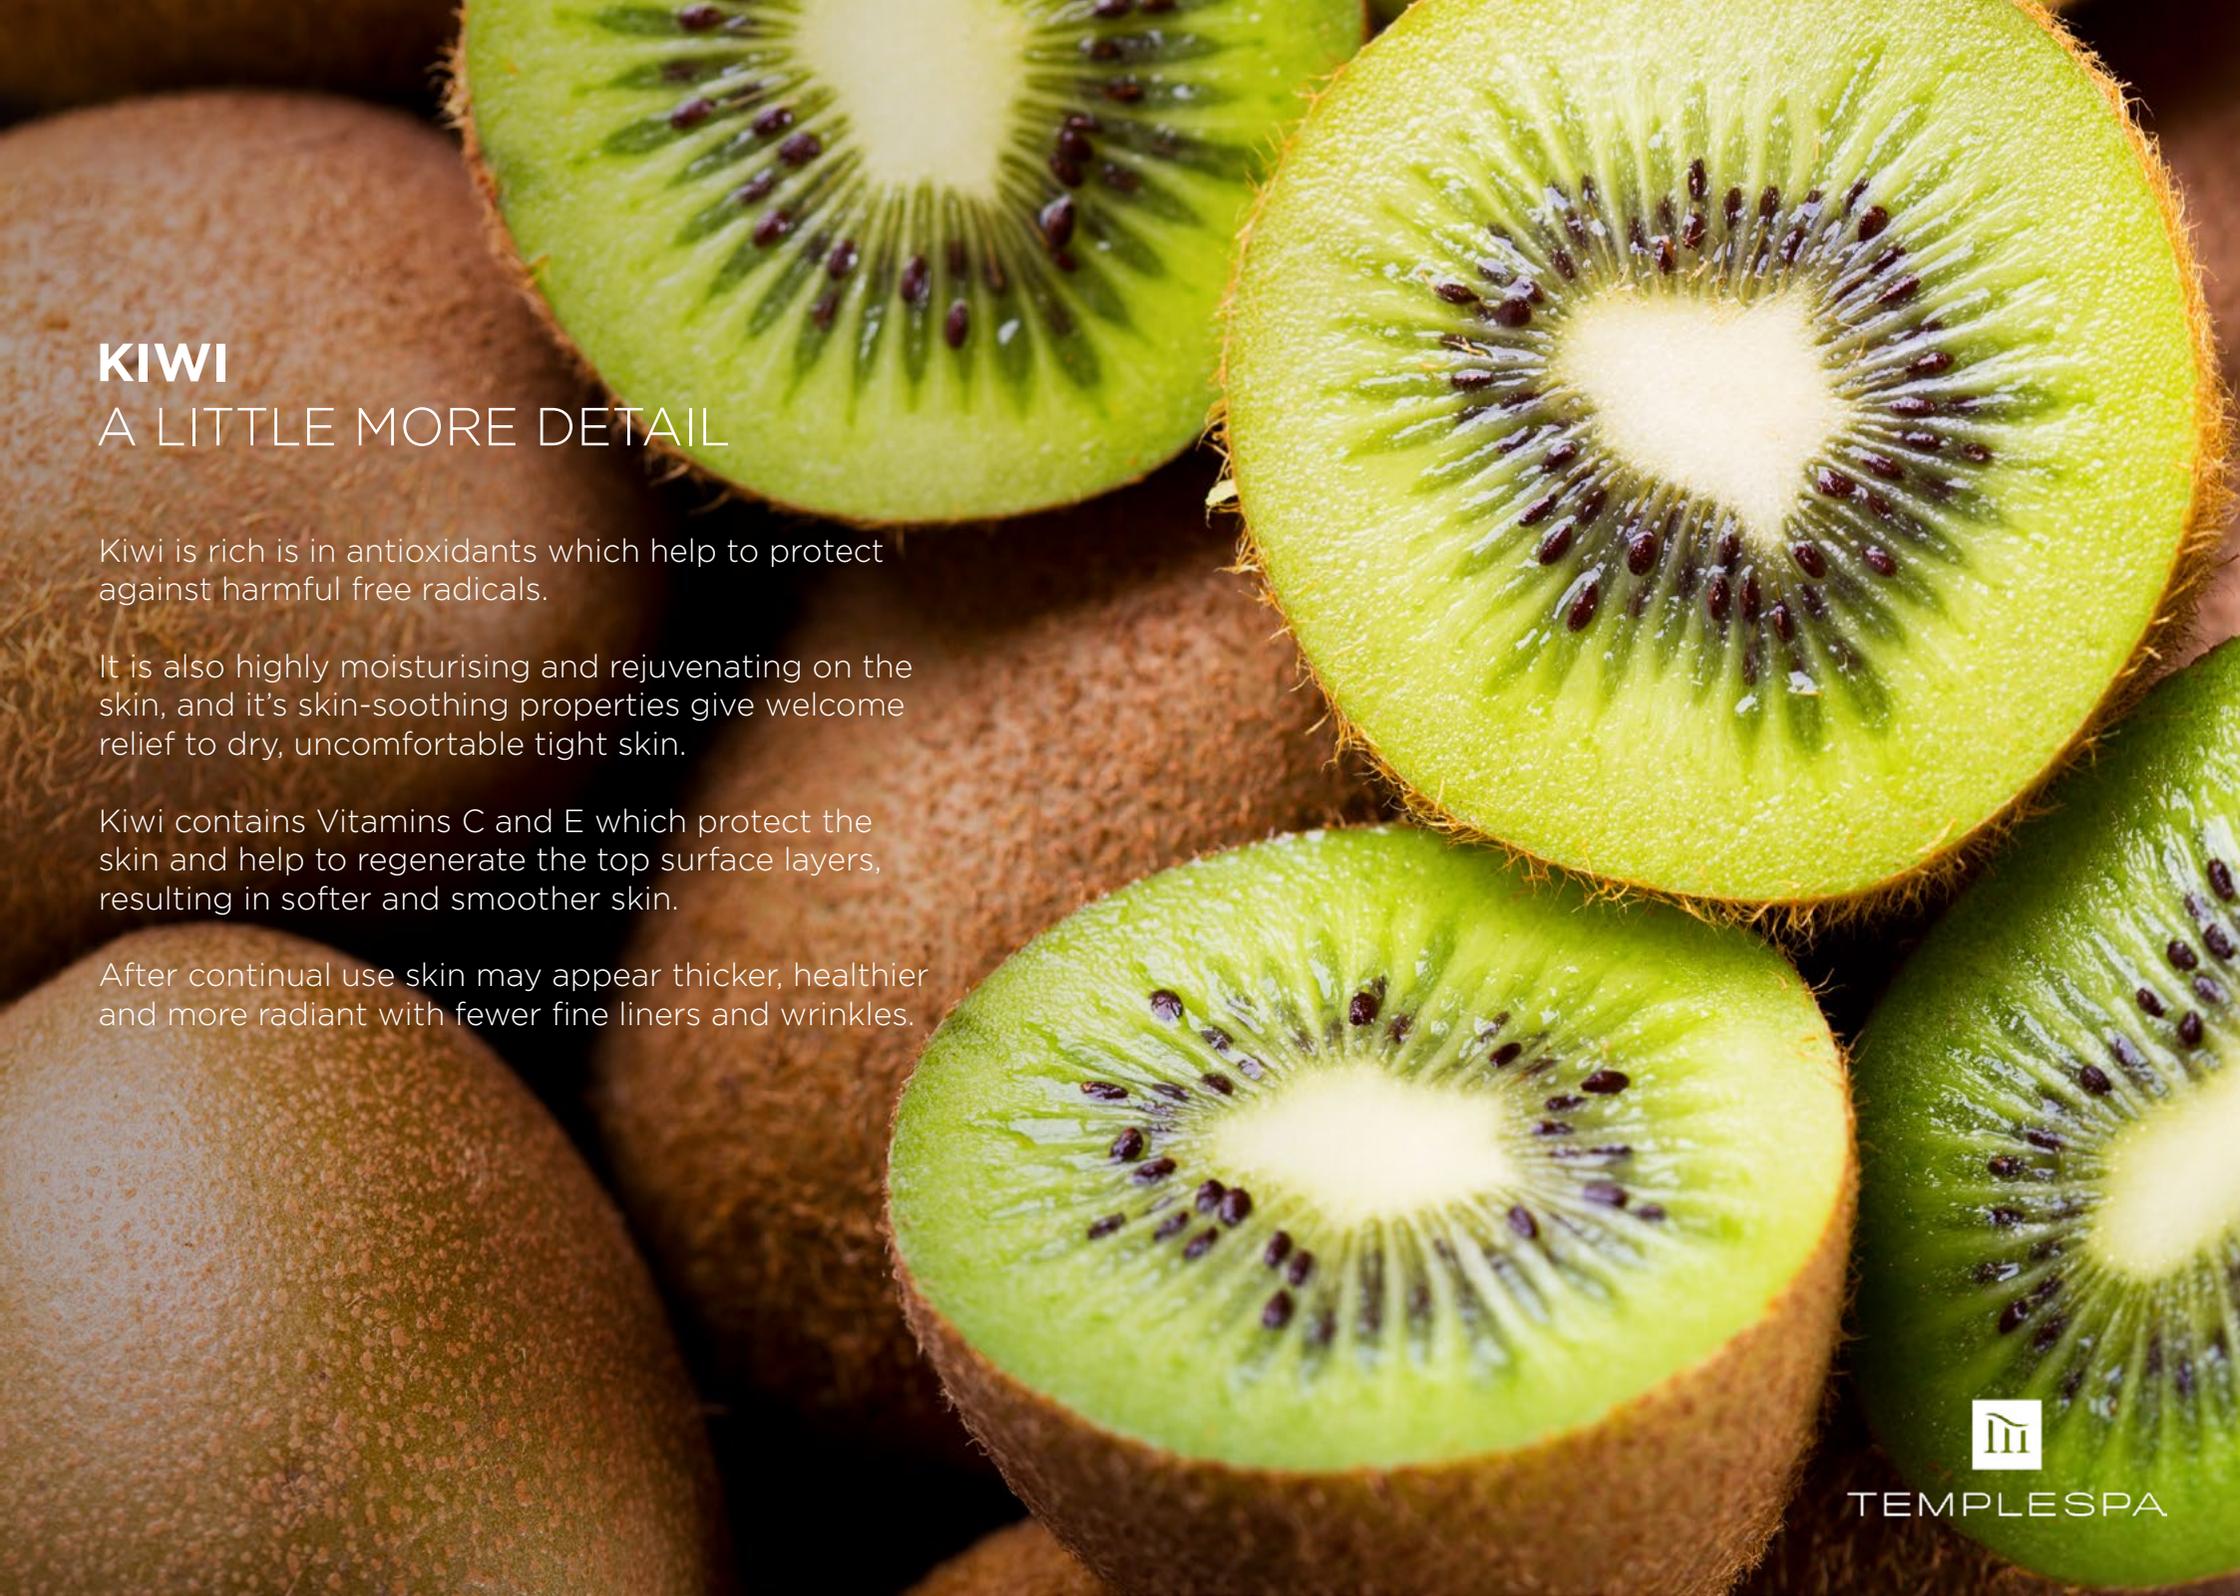

Apple trees are cultivated all over the world, and have been grown for thousands of years in Asia and Europe.

Apples are rich in minerals and vitamin c which helps to brighten the skin. They are antioxidants that help protect the skin from premature ageing. They can provide essential hydration which helps to tone and improve your skin complexion.

Apples contain natural fruit acids that gently exfoliate and buff away dead skin cells helping to brighten the skin.

TEMPLESPA

KIWI

A LITTLE MORE DETAIL

Kiwi is rich in antioxidants which help to protect against harmful free radicals.

It is also highly moisturising and rejuvenating on the skin, and its skin-soothing properties give welcome relief to dry, uncomfortable tight skin.

Kiwi contains Vitamins C and E which protect the skin and help to regenerate the top surface layers, resulting in softer and smoother skin.

After continual use skin may appear thicker, healthier and more radiant with fewer fine lines and wrinkles.

TEMPLESPA

CHAMOMILE

A LITTLE MORE DETAIL

Chamomile is known for its soothing and relaxing properties, it has a calming effect and can be used to aid sleep.

It is rich in essential oils and antioxidants, giving it anti-irritant and anti-inflammatory properties and is ideal for sensitive and acne prone skin. It helps to soothe, restore and condition skin by moisturising, nourishing and helping to eliminate free radicals that damage skin and accelerate the ageing process.

With its anti-inflammatory and anti-microbial properties, it helps encourage the growth of healthy hair, nourishes and conditions both hair follicles and the scalp, soothing irritation and helping to eliminate dandruff.

TEMPLESPA

WHAT SIZES ARE AVAILABLE & **HOW TO RECYCLE AFTER USE?**

Most Revealing is available in a 50ml airless pump pack. The airless pack is critical in preserving the formulation and ensuring it doesn't activate prior to use.

Unfortunately, airless pack (bottle and pump) aren't recyclable but its something we are working on. The cap is made from PP which is recyclable.

The carton is made from FSC source material and is 100% recyclable.

Equally we are also still working hard on a sample size for this wonderfully innovative formulation.

RRP £40 For 50ml

TEMPLESPA

FREQUENTLY ASKED QUESTIONS

Q: Can I use this product if I have sensitive skin?

A: MOST REVEALING contains a blend of acids which can cause skin sensitivity in some people. We have patch tested the product and it is suitable for all skin types, but would recommend if you have sensitive skin to do a patch test first and discontinue use if you have any type of reaction.

Q: How and why does Most Revealing bubble and fizz on the skin?

A: The bubbling effect in Most Revealing is created by an ingredient in the formulation that has a chemical reaction on exposure to oxygen.

The ingredient is encapsulated and the rubbing of the formulation onto the skin helps to break the encapsulation and this is what initiates the bubbling effect. The effect has been described as being similar to a fizzing carbonated drink but for the skin.

The ingredient that creates this effect is 'Methyl Perfluorobutyl Ether' which has a very 'chemically' scary sounding name but its perfectly safe to use (If it wasn't we wouldn't use it).

Q: Will using a glycolic mask whiten / bleach my skin? Is whitening and brightening my skin the same thing?

A: MOST REVEALING won't whiten or bleach your skin. MOST REVEALING is designed to brighten the skin, it does this by removing dead skin cells and smoothing the surface of your skin. The brightening effect is created when light reflects off the smoother surface of your skin. This is why rough uneven skin can appear dull and grey.

Skin whitening is where a product provides a treatment that effectively bleaches the skin providing you with a different skin tone to the one you have naturally. MOST REVEALING doesn't contain any ingredients that bleach or change your natural skin to

Q: How long will it take to work?

A: You should feel some instant benefit when using MOST REVEALING and like any other skin care product regular and consistent use is key. You should notice improved results after 2-3 weeks of use.

FREQUENTLY ASKED QUESTIONS

Q: Are the glycolic, mandelic and lactic acids in the mask harmful to my skin?

A: The use of alpha hydroxy acids (AHAs) such as glycolic, mandelic and lactic acids in cosmetics and toiletries is perfectly safe. The ingredients are restricted in their inclusion level to ensure that they are safe to use.

Q: Will my skin be more prone to sun damage after treating my skin with a glycolic mask?

A: Yes, a glycolic mask exfoliates the skin so new skin cells are exposed more quickly. These newer skin cells are more susceptible to damage from UVA and so we highly recommend using a broad spectrum sunscreen with UVA filters during use and when your skin is in daylight - LIFE DEFENCE is of course the best to reach for and will ensure your skin stays protected. If using MOST REVEALING at night then there is no need to add a sunscreen afterwards. The product does carry a sun risk warning to flag this. It's great at making skin shiny and new but you'll need a SPF to protect it.

Q: Will using a glycolic mask affect my fake tan?

A: It would be good to use MOST REVEALING prior to using an instant fake or self-tan to exfoliate and prep the skin for a nice even application. Using MOST REVEALING after self-tan application would fade your tan faster as would any exfoliating action but it will keep the skin and tan fresh looking and even and ready for a new application.

Q: Will the product lighten my skin?

A: With over exposure to natural sun light our skin can suffer from hyperpigmentation and we get dark uneven patches of skin on our faces. MOST REVEALING has been formulated to help exfoliate the top layers of the skin where this uneven pigmentation occurs. The newer skin cells that then emerge will be based on your natural skin tone and over time with regular use your skin tone will become lighter as the hyperpigmentation is reduced.

Q: How long will the product last?

A: Two pumps once a week should make the product last around six months. Two pumps twice a week should last three months.
